

BUSINESS PROJECT

WHAT PROBLEM DO WE WANT TO SOLVE?

WHAT IS SPETTRIX?

It's a great alternative to normal lights, is a reflective surface that you can apply on any plane, and using the lights already present (such as street lamps) it will illuminate your windows.

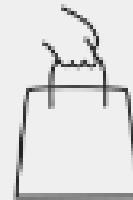

WHO ARE OUR CLIENTS?

We are going to sell Spettrix to hardware and furniture stores who want to pollute less and keep up with the times

WHY SHOULD THEY BUY SPETTRIX?

So that shopkeepers save energy and money
