# Learning styles | KIDS4ALLL Learning Environment

**learn.kids4alll.eu**/en/tg1/know-what/learning-styles

4. November 2022

## Primary tabs

## Learning styles

Think about yourself studying! How do you study? What makes it difficult and what helps you? Do you learn best alone or in a group? Start this unit, find out how you learn best and find ways to improve your process towards learning!

Before diving in the unit, test your knowledge together with your buddy: scroll down the page and take the quiz!

## Take the test to find out your learning style!

Learning Style Quiz

### Done?

### Then check your results!

Learning Style Results

Learning Styles Explanations

Did you take the test? Now compare your results!

Compare what you think would help both of you learn more effectively. Write down at least 3 ideas!

## Now it is time to dream!

Design together with your buddy a learning environment where both of you could learn according to your learning styles! Think about the following factors:

- space
- furniture
- equipment
- materials

## List the characteristics needed for this personalised learning environment or create it through a drawing!

Done?

Get together with at least two buddy teams and share your designs with them!

Is it possible to create a learning environment that fosters everyone's learning process?

## That is your new challenge:

All together, create a plan/presentation of a perfect learning environment that would meet the needs of all learners to make the most of your learning process!

Tip: You can create it on paper in the form of a poster or online!

If you want your content to be in the KIDS4ALLL gallery, please ask your educator to upload it in the work.it area.

How did you feel during this activity? Discuss this with your buddy and then create a postcard together (an image or a short video) which shows your feelings and thoughts!

What changes do you wish for in your learning environment or learning habits? **Discuss it with your buddy!**

Talk about it with your peers, parents/tutors and teachers/educators and discuss how to put theory into practice and create the change which you might be needing within your learning environment.

Download the free KIDS4ALLL app and your wish comes true!
