# Don't Feed the Phish

 common sense education®

# Essential Question

How can you protect yourself from phishing?

# Learning Objectives

1

Compare and contrast identity theft with other kinds of theft.

2

Describe different ways that identity theft can occur online.

3

Use message clues to identify examples of phishing.

## WARM UP: THINK-PAIR-SHARE

What's something you own that someone else might want to steal? Why? What would they do with it?

Directions:

1. Take a moment to think silently about these questions.
2. Then, take turns sharing your responses with your buddy.

# Identity theft

A type of crime in which your private information is stolen and used for criminal activity

# Private information

Information that can be used to identify you because it is unique to you (e.g., your full name or your address)

# Thieves Use Others' Information To . . .

cyberbully someone.

create false documents.

buy things with others' money.

get loans, jobs, or driver's licenses.

# Internet scam

An attempt to trick someone online, usually with the intention of stealing money or private information

# Phishing

When someone poses as an institution, like a bank or a school, and sends you a personalized message asking you to provide private information

You've got cash! Hi, this is to inform you that The Official Bank of US wish kindly to send you the amountof \$2,000 from your relative. Click link for instant transfer: [Get\\$\\$\\_now](#)

 Type a message  

# Shortened URL

---

A web address that has been condensed and that could potentially mislead a user into going into a risky website

# Directions

1. Discuss the clues to messages that may be phishing scams.
2. Highlight clues in the messages.
3. Add a note about the clue in the box.

# Stay Safe from Scams

1. What is important to know about shortened URLs?
2. What else should you check for in a message? Give two examples.
